Dear colleagues!

The Department of International and Integration Law of the M.M. Speransky Faculty of Law of the Institute of Law and National Security of the Russian Presidential Academy of National Economy and Public Administration (RANEPA), with the participation of the Center for Applied Analysis of International Transformations of the Department of Theory and History of International Relations of the Peoples' Friendship University of Russia named after Patrice Lumumba (RUDN University) invites you and your colleagues to participate in the 2nd International Scientific and Practical Conference "International Law and the Development of the Global Transport System".

The conference aims to become a platform for a productive dialogue, the exchange of experience and best practices between representatives of government agencies, businesses, and academics on current issues of International Transport Law and international cooperation in the field of transport. They are developing in the context of geopolitical transformation and sanctions restrictions, which significantly impact legal regulation, the economy, and the choice of transport and infrastructure development strategy in the States and internationally. This choice determines the areas of cooperation between States and international organizations in transport, the nature of interaction between customs authorities, and the formation of international transport corridors. Digitalization and scientific and technological progress remain key factors influencing the development of interstate cooperation. The conference aims to unite the expert community to develop and implement new legal models, methods, and technologies for the development of international, (inter)regional, and domestic transport systems, taking into account the interests of the Russian Federation.

- Conference participants will discuss the following issues:

- - development of International Air Law under sanctions: challenging conditions and new opportunities;
- - transformation of the global transport system: where are we heading?
- - international transport corridors: legal dimension and logistics of the future;
- - ensuring transport security: current challenges and solutions;
- - legal regulation of international passenger and cargo transport;
- - strategic directions for the development of Eurasian economic integration and transport
